- 15 SeaDataCloud partners (as distributor) have added or deleted data in the CDI catalogue, for a total decrease of **-94 records**. All the negatives numbers of the previous table are explained by a bug in the Import workflow during the transition to dataset access restriction 'CB' from 'UN', 'LS': the ordering of some CDIs and their data files wasn't working correctly. MARIS decided to deactivate these CDIs and ask the partners to insert them again. The reloading by partners is ongoing.
- 7 others partners, not in the SeaDataCloud consortium, have worked for an increase of **+155 records**.

There are 115 partners (as distributor) with CDIs :

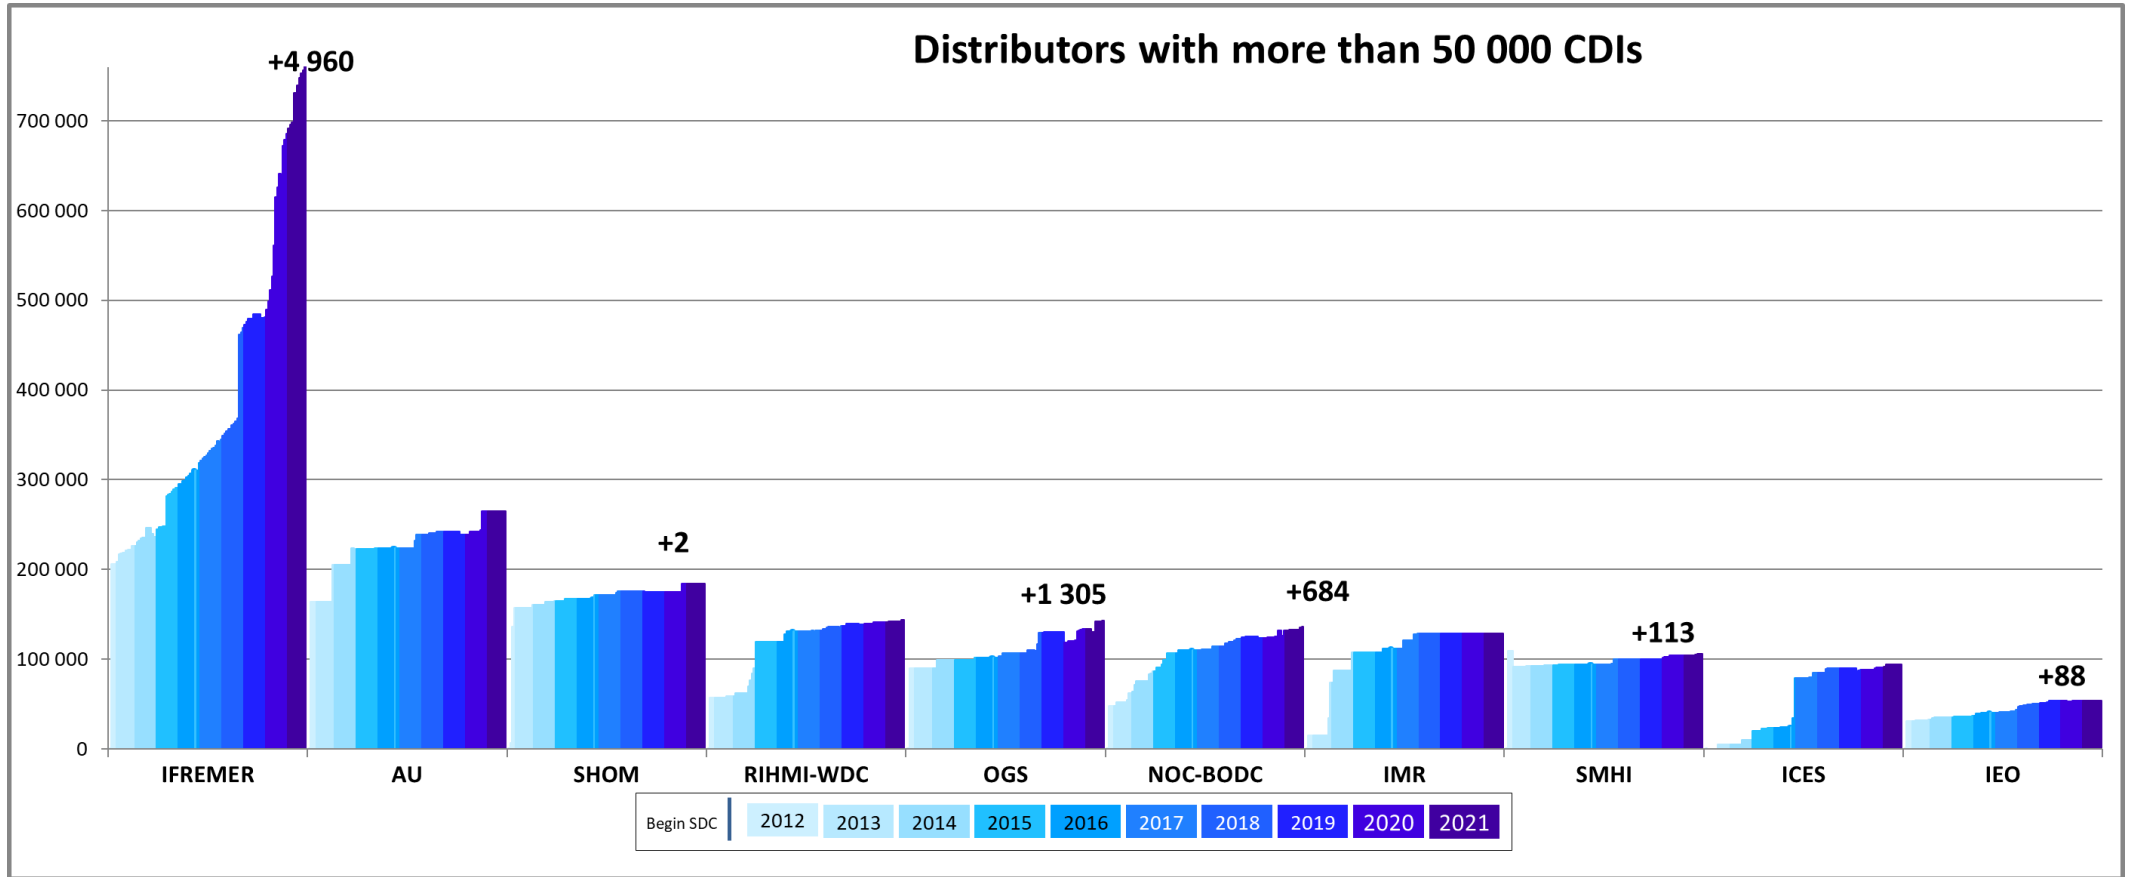

- 43 SeaDataCloud partners and
- 72 other partners.

Since the beginning of the follow-up reports (October 2012), the increase in CDI since start SDC (November 2016), between end SDN2 (September 2015) and start SDC, increase since SDN2, per partner, is the following: Note that for SMHI and SIO-RAS the negative increase since start SDN2 is due to the change in their time series management (SMHI), the change of data owner and the remove of incorrect records (SIO-RAS). The new owner is SOI, not in the SeaDataCloud consortium).

Statistics on CSR back office

This are the statistics from the new CSR back office allowing some partners (CSIC, IEO, HCMR, MI, OGS and SISMER) to upload their CSR reports in the central catalogue. This month, 29 new CSRs and 64 updates have been uploaded by CSIC, IEO, SISMER.

In the near future, more and more data centers will have access to the back office.
