

SeaDataNet

Pan-European infrastructure for Ocean & Marine Data Management

International conference on

Marine Data and Information Systems

IMDIS 2010

Paris, 29 - 31 March 2010

ORGANIZING COMMITTEE

Michele Fichaut – France
 Gilbert Maudire – France
 Loic Petit de la Villéon – France
 Vanessa Tosello – France
 Sissy Iona – Greece
 Giuseppe M.R. Manzella – Italy
 Dick Schaap – The Netherlands
 Peter Pissierssens – Unesco
 Lorenza Saracco – EU

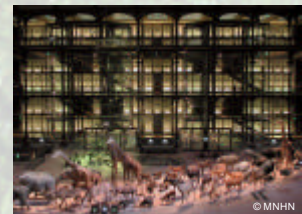

Organized by SISMER/IFREMER,
jointly with SeaDataNet and IOC/IODE

TOPICS

1. Data quality issues in ocean science
 - Observations and analysed data control procedures,
 - Protocols,
 - Quality of Services for real time and delayed mode data.
2. Data Circulation and Services in ocean science
 - Data access and sustainability,
 - Web services,
 - Network services, technologies and security,
 - Open-source tools and technology on marine data management.
3. Interoperability and Standards in Marine Data Management
 - Open standards,
 - ISO and OGC standards applications,
 - Data/Metadata models,
 - Common vocabularies,
 - Interoperability forms.
4. Education in ocean science
 - Education and Research,
 - Internet and stand-alone tools for education,
 - Test bed development for educational purposes,
 - International collaboration in Education.

Muséum National d'Histoire Naturelle – Paris 5^{ème}
