Cruise Summary Report Inventory

19.- 20.10.2012 Plenary Meeting, Rhodes

Anne Che-Bohnenstengel, BSH

SDN II Cruise Summary Reports

- Main objectives of new version
 - faster web page loading & user friendlier application
- BSH has started to promote usage of Online CMS within the German cruise leader community
- Some feedback already incorporated into SDN II application
- More comments from partners and users are welcome
- Criticisms help to improve the application

SDN II Look and Feel - User Interface *already operating*

- 14 records have been submitted online since 1. August
- the fastest CSR submission was received on the day the Meteor returned to Bremerhaven

Details of Vizconde de Eza Cruise INDEMARES/CH/CA 1011

GENERAL INFORMATION			
Platform/Ship	Vizconde de Eza		
Cruise begin	20.10.2011		
Cruise end	01.11.2011		
Port of Departure	Cadiz, Philippines		
Port of Return	Cadiz, Spain		
Chief Scientist(s)	DÍAZ DEL RÍO VÍCTOR - IEO/ Malaga FERNÁNDEZ LUIS MIGUEL - IEO/ M		
Responsible Laboratory	IEO/ Malaga Oceanographic Centre		
LOCATION			
General Ocean Areas	North East Atlantic Ocean (limit 40W)		
Marsden Squares(S, N, E, W)	109 (30.0, 40.0, -10.0, 0.0)		
Bounding Box(es)	WEST	EAST	SOUTH
	-8	-5.5	35.5
Specific Geographic Areas	The oceanographic cruise is located bathymetric contour. Gulf of Cadiz		
Link to Track Charts	Trackchart		
PROJECT			
Project Title / Coordinating Body	INDEMARES - Inventory and design Marine Environs - General Secretariat		
OBJECTIVES			
Description	The main goal of the INDEMARES C associated with habitats related to the seismic profiles and submarine vide 1st November 2011 having Cadiz as October owing to the stormy weather

E-mail: ieomalaga@ma.ieo.es

METADATA ENTRIES

ORGANISATION PROFILE

The organism belongs to the Instituto Español de Oceanografía and holds research activities on:

- Physical, chemical and geological oceanography, marine contamination in the western Mediterranean, the Strait of Gibraltar and Gulf of Cadiz.
- pelagical ecology in the Alboran Sea and the Strait of Gibraltar.
- antarctic benthos
- Geographical information systems applied to resource management
- Acoustic evaluations of pelagical fishes in the Mediterranean and south-atlantic area
- Ichthyoplankton: growth and larval status
- large pelagics and associated species resources of the Mediterranean and Gulf of Cadiz region.
- demersal resources of the Mediterranean and Gulf of Cadiz.
- Fisheries resources (fish and crustacean) of northwestern Africa.

Details of Vizconde de Eza Cruise INDEMARES/CHICA 1011 (BSH)

GENERAL INFORMATION	
Platform/Ship	Vizconde de Eza
Cruise begin	20.10.2011
Cruise end	01.11.2011
Port of Departure	Cadiz, Philippines
Port of Return	Cadiz, Spain
Chief Scientist(s)	DÍAZ DEL RÍO VÍCTOR - IEO/ Malaga Oceanographic Centre FERNÁNDEZ LUIS MIGUEL - IEO/ Malaga Oceanographic Centre
Responsible Laboratory	IEO/ Malaga Oceanographic Centre
LOCATION	
General Ocean Areas	North East Atlantic Ocean (limit 40W)
Marsden Squares(S, N, E, W)	109 (30.0, 40.0, -10.0, 0.0)
Bounding Box(es)	WEST EAST SOUTH -8 -5.5 35.5 37
Specific Geographic Areas	The oceanographic cruise is located in the Gulf of Cadiz bathymetric contour.
Link to Track Charts	Trackchart
PROJECT	
Project Title / Coordinating Body	INDEMARES - Inventory and designation of a coastal Marine Environ - General Secretariat of the Sea
OBJECTIVES	
Description	The main goal of the INDEMARES CHICA 1011 associated with habitats related to the gas seeps, seismic profiles and submarine video and photo. 1st November 2011 having Cadiz as a base port. October owing to the stormy weather. It has been obtained a total of 1636 nautical miles of bathymetric and seismic data from the upper

SDN II Look and Feel - CSR CMS

What is new?

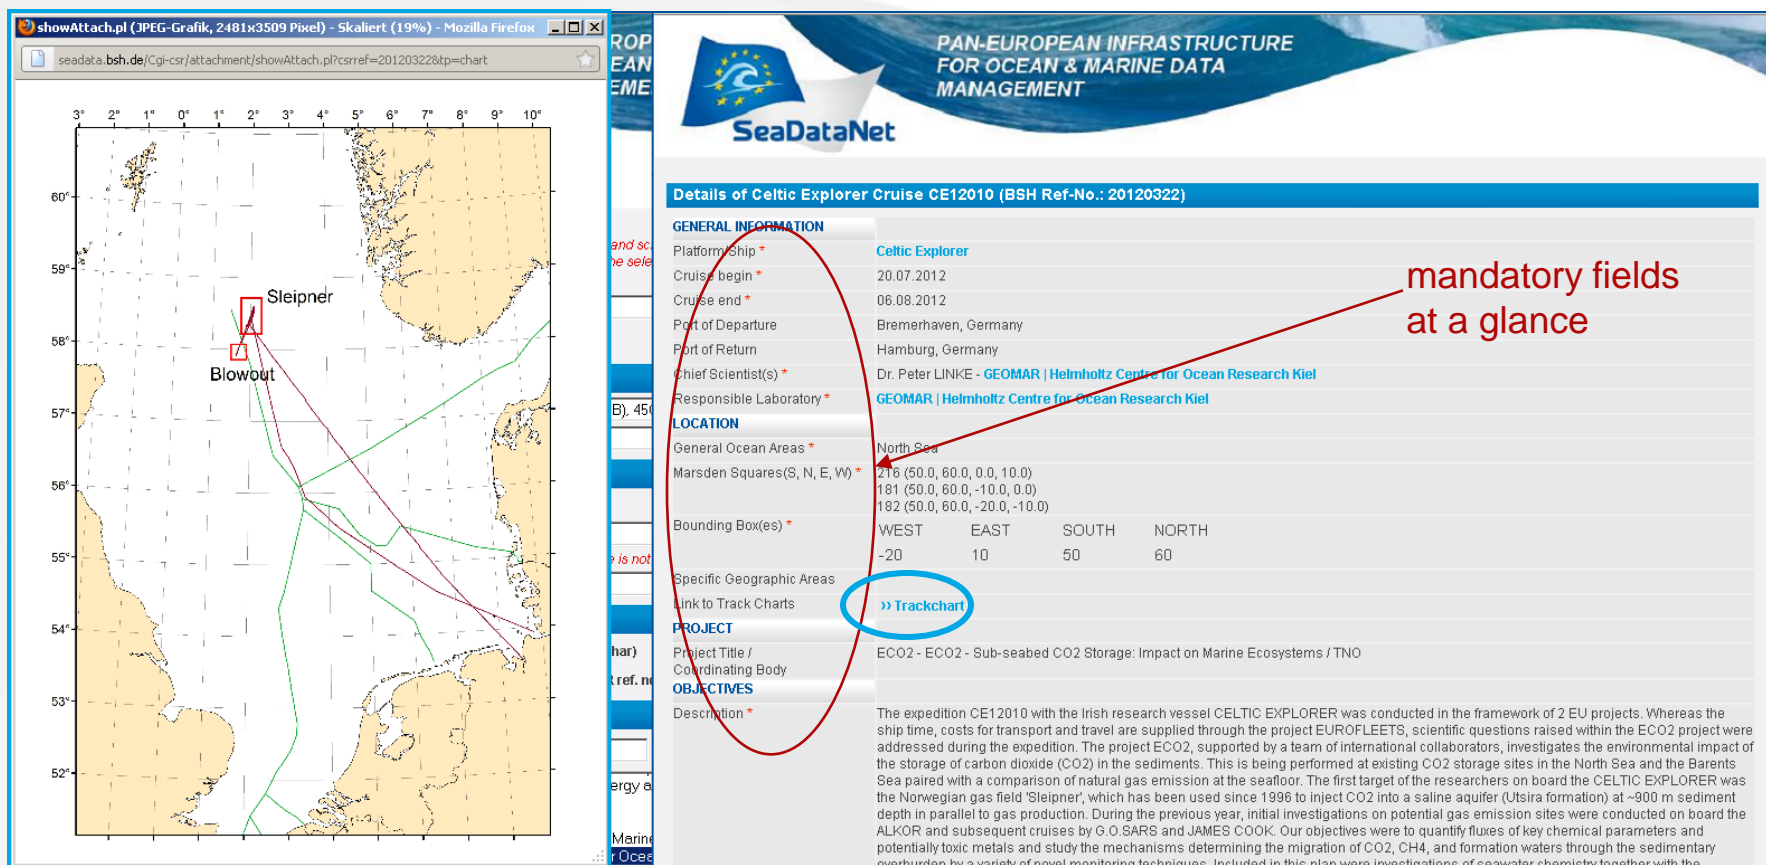

- preview of report layout during input (including track charts)
- quick search for long selection lists and flexible multiple selection
- scientists ordered by surname and organisation and not by organisation and surname

http://seadata.bsh.de/csr/online/sdn2_index.html

19.- 20.09.2012 1. Plenary Meeting, Rhodes

Anne Che-Bohnenstengel, BSH

SDN II Look and Feel - CSR CMS *Preview of input*

SDN II Look and Feel - CSR CMS *Flexible multiple selection*

- enter any text string into “Search string” field*
- make single or multiple selection from subset
- “Add more” - stepwise more selection
- display of selected items after saving

Project (if applicable)

If the cruise is designated as part of a larger scale cooperative project (or sub-project or programme) please select the name of the project

Select project(s) Search string: seis Add more Delete all entries

589/95 - An improvement of deformation supervisions in the system of the seismic monitoring
589/96 - Measurements of deformations and inclinations in the mode of monitoring for the Crimean- Black Sea region and research of their correlation
AMPHITRITE - AMPHITRITE - Techniques for the Development of an Methodology for Seismic Hazard Assessment
ESTIA - ESTIA - Advanced Software Program and Integrated system for decision support and seismic risk management
EUROSEISMIC - EUROSEISMIC

selected Project(s)

Additional information on parameters measured/instruments used during the cruise

Select parameter(s) Search string: seis Add more Delete all entries

Active seismic refraction
Passive seismic refraction
Seismic reflection
Seismic refraction
Three-dimensional seismic reflection

selected parameter(s)

Air pressure
Air temperature
Date and time
Sea level
Temperature of the water column
Wave height and period statistics
Wind speed and direction

Select device(s) Search string: seis Add more Delete all entries

1000 Hz top-bandwidth multi-channel seismic reflection systems
1000 Hz top-bandwidth single-channel seismic reflection systems
2000 Hz top-bandwidth multi-channel seismic reflection systems
2000 Hz top-bandwidth single-channel seismic reflection systems
250 Hz top-bandwidth multi-channel seismic reflection systems

selected device(s)

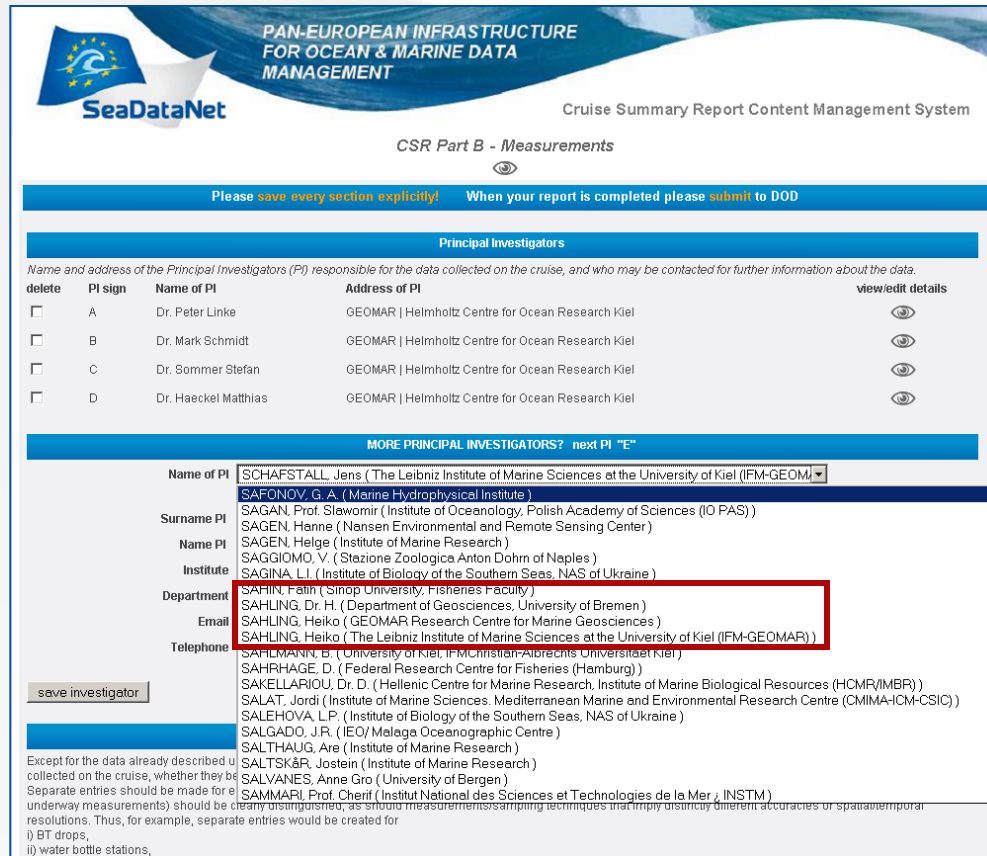

anemometers
thermosalinographs
wave recorders

Any other information / attachment?

* Thanks to Aleksandar Jovicic for useful tips

SDN II Look and Feel - CSR CMS *Scientist list*

- surname in alphabetical order
- all entries for one person together
- exact knowledge of English organisation name not necessary

SALVANES, Anne Gro (University of Bergen)

SAMMARI, Prof. Cherif (Institut National des Sciences et Technologies de la Mer / INSTM)

Except for the data already described or collected on the cruise, whether they be Separate entries should be made for e underway measurements) should be clearly distinguished, as different measurement/sampling techniques and primary data by different accuracies or spatio-temporal resolutions. Thus, for example, separate entries would be created for

i) BT drops,

ii) water bottle stations,

Comments to CSR upgrading via XML

- Best way is to demand XML records, which can be loaded into MIKADO, from BSH (record name is BSH CSR reference number)
- return these records to BSH after completing the V1 contents
- otherwise please include mapping of new V1 record to BSH CSR reference number (available from CSR user interface)
- Reason:
 - not always possible to identify the correct V0 records by comparison of ship, start/end dates and ports
 - free text of names and differing dates lead to wrong conclusion
- Please check for duplicate records using CSR user interface

CSR - next steps ?

- SDN II user interface already operational
- SDN II Content Management System in October 2012
 - more improvements will follow

2013

- ISO 19139 + GML ingestion
- Web Map Service for GML track display

Appeal to less active partners

Please try to submit / upgrade at least 10 records till end of the year

Thank you

Any questions or comments?
