

# SeaDataNet

The contribution of the SeaDataNet  
infrastructure in the Arctic studies

Leda Pecci – ENEA (Italy), Simona Simoncelli – INGV (Italy)

EGU Conference, Vienna, Austria, 8-13 April 2018

[sdn-userdesk@seadatanet.org](mailto:sdn-userdesk@seadatanet.org) – [www.seadatanet.org](http://www.seadatanet.org)

**SeaDataNet is a comprehensive Pan-European semi-distributed marine data infrastructure**, providing access to multidisciplinary, integrated marine and ocean data and products of standardised quality, services, as well as an overview of marine organisations, research and monitoring activities related to the sea.

- **IMDIS conference**

SeaDataNet started in the 1990s and has been developing over the years thanks to EU funded projects:

90	Metadata directories Medar/MedAtlas
2002-2005	Sea-Search (FP5)
2006-2011	SeaDataNet (FP6)
2011-2015	SeaDataNet II (FP7)
2016-2020	SeaDataCloud (H2020)

→ a single access for a wide range of data of different types

HOW TO CONTRIBUTE?

## PRODUCTS

SeaDataNet provides aggregated datasets (ODV collections of all SeaDataNet measurements of temperature and salinity by sea basins) and climatologies (regional gridded field products based on the aggregated datasets) for all the European sea basins.

# SeaDataCloud project activities

This project has received funding from the European Union's Horizon 2020 Research Infrastructures programme, under the grant agreement No 730960".

## Upgrading and innovating existing services for users and data providers:

- Advancing the CDI service by adopting cloud
- Introducing 'Linked Data principle' to catalogues for semantic web
- Adding transformation facility for INSPIRE compliance

## Developing new services for users and data providers:

- SWE Ingestion service for Real Time data streams
- Brokerage service for mutual exchange with international data networks
- Virtual Research Environment (VRE) with advanced services: subsetting, online ODV, DIVA, and visualisation

# Challenges for the Arctic regions

## Northern Hemisphere Sea Ice Extent

Climate Change  
T increase and SI extent reduction

# Challenges for the Arctic regions

In 2016, the Commission and the High Representative for Foreign Affairs and Security Policy of the EU have updated the policy on Arctic, defining the following “priority areas”:

- Climate change and safeguarding the Arctic environment
- Sustainable development in and around the Arctic
- International cooperation on Arctic issues

# How SeaDataNet supports arctic studies

EGU Conference, Vienna, Austria, 8-13 April 2018

Arctic → "engine" of the planet's climate and crucial for understanding the climate evolution and its impact on the planet and the global economy. To get data in the Arctic's extreme conditions it is really challenging.

SeaDataNet contribution:

- data, metadata, T/S climatologies
- information about projects and institutions involved in on that regions

**High quality data** is available because of contributors specialised in monitoring the Arctic regions

Credit: ENEA

Credit: ENEA

# Data Summary in the Arctic by instruments

- 140.000 data sets taken in the Arctic over 1851-2018
- Data is mainly distributed in the following fields:

SUMMARY

PER INSTRUMENT/TYPE	DATASETS	DURATION IN HOURS	DURATION IN DAYS	DURATION IN YEARS
<a href="#">CTD</a>	71598	1.493.252	62.219	170,46
<a href="#">discrete water samplers</a>	57726	1.106	46	0,13
<a href="#">salinity sensor</a>	8917	1.171	49	0,13

# The highlights

- Easy to use for end-users and data providers
- 110 Data centres providing data and metadata
- More than 2.100.000 ocean data sets available
- Vocabulary governance and services
- Standard QA-QC procedures, method for checking possible duplicates
- Standards and interoperability solutions widely recognized by the international community, beyond European borders.

SeaDataNet is present in the ODIP project and it collaborates with the existing global infrastructures such as the IOC-IODE – Ocean Data Portal (ODP), GEOSS and the International Council for Science World Data System (ICSUWDS).

Australian Government

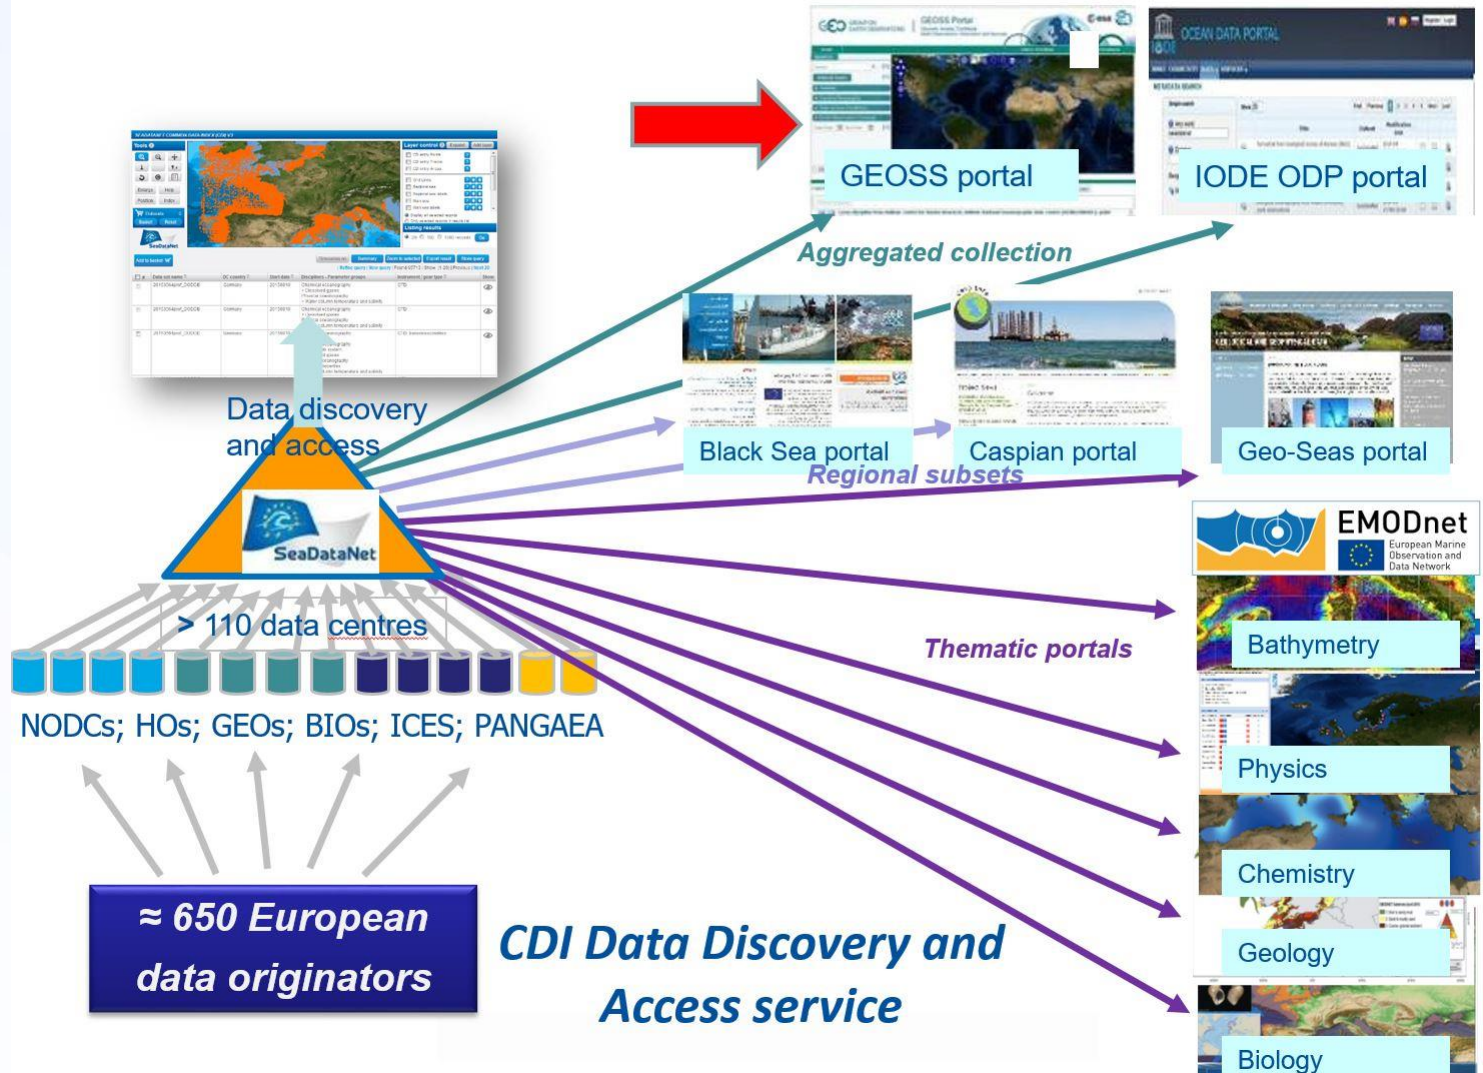

# Cooperation and involvement

- **Copernicus Marine Environmental Monitoring Services (CMEMS):** providing long-term archives and standards
- **Marine Strategy Framework Directive (MSFD):** providing infrastructure, standards and data collections for several indicators
- **Large ocean monitoring systems (EuroGOOS, AtlantOS, Euro-ARGO, JERICO-Next, EuroFleets, ..):** providing standards and validation + long-term archiving services
- **Ocean Data Interoperability Platform (ODIP):** exploring and demonstrating common standards and interoperability with leading data management infrastructures in USA and Australia
- **GEOSS - EuroGEOSS:** feeding GEOSS portal with SeaDataNet in-situ data collections from large community of European data holders (> 100 data centres; >600 data originators)
- **European Open Science Cloud (EOSC):** shaping the pilot Blue Cloud
- **European Marine Observation and Data Network (EMODnet):** driving and serving many EMODnet thematic portals

CDI service driving and serving many portals and communities

Barcelona, 5-7 November, 2018

[imdis.seadatanet.org](http://imdis.seadatanet.org)

Organised in the frame of SeaDataCloud project funded by the EU Horizon 2020 Research Infrastructures programme

#### 4 plenary sessions :

1. Data services and tools in ocean science
2. Technical developments for marine information and data management
3. Marine environmental infrastructures for observation data (data management and access)
4. Data products, information and knowledge

Submit your abstract before **30<sup>th</sup> April 2018**
