***SeaDataCloud – further developing the pan-European
SeaDataNet infrastructure for marine and ocean data
management***

Outline

- The infrastructure: ***SeaDataNet***
- The on-going development project: ***SeaDataCloud***
- Position in the ecosystem of data/observing systems

- The infrastructure: ***SeaDataNet***

What is SeaDataNet?

A pan-European infrastructure set up and operated for managing marine and ocean data in cooperation with the NODCs and data focal points of 35 countries bordering the European seas

2006-2011	Metadata directories MEDAR/MedAtlas
2002-2005	Sea-Search (FP5)
2006-2011	SeaDataNet (FP6)
2011-2015	SeaDataNet II (FP7)
2016-2020	SeaDataCloud (H2020)

SeaDataNet

PAN-EUROPEAN INFRASTRUCTURE
FOR OCEAN & MARINE DATA
MANAGEMENT

1.95 million CDI entries from ***34*** countries, ***102*** data centres and ***612*** originators for physics, chemistry, geology, geophysics, bathymetry and biology; from ***1805 to 2017***; ***87.6%*** unrestricted or under SDN License

SeaDataNet products

Aggregated datasets and climatologies

Improvement of the data quality – Scientifically sound synoptic “views” of the marine regions

- The on-going development project: ***SeaDataCloud***

SeaDataNet

PAN-EUROPEAN INFRASTRUCTURE
FOR OCEAN & MARINE DATA
MANAGEMENT

SeaDataCloud – general challenges

- It is about updating and further developing **standards**
- It is about improving and innovating **services & products**
- It is about adopting and elaborating new technologies
- It is about giving **more attention to users** and putting the user experience in a central position
- Moreover, it is about **implementing a strategic and operational cooperation** between the SeaDataNet consortium of marine and ocean data centres and the EUDAT consortium of e-infrastructure service providers

SeaDataNet

PAN-EUROPEAN INFRASTRUCTURE
FOR OCEAN & MARINE DATA
MANAGEMENT

SeaDataCloud – cooperation with EUDAT

European Computing Infrastructure

A consortium of high performance computing (HPC) / data centres, libraries, scientific communities, data scientists

SeaDataCloud topics

- Standards:
 - Vocabularies
 - Data Formats
 - **Expanding INSPIRE compliance**
 - **Sensor Web Enablement (SWE)**
 - Data Management for new data types
- Services:
 - Implementing **Linked Data** for SeaDataNet directories for M-to-M services
 - Upgrading the CDI Data Discovery and Access service **making use of the cloud**
 - Integrating data offering from international programmes and organisations
 - Integrating INSPIRE Transformation services
 - **Data publishing**

SeaDataCloud topics

- Developing and deploying a **Virtual Research Environment (VRE)**:
 - Collaborative environment
 - Cloud computing
 - Big data
 - **Advanced e-services to facilitate research for handling, curating, quality controlling, transforming and processing marine and ocean data into value-added analyses, harmonised data collections, and data products which can be integrated, visualised and published using OGC and high level visualisation services.**
- **Products:**
 - **Improved T&S Climatologies – cooperation with Copernicus Marine Environmental Monitoring Service**

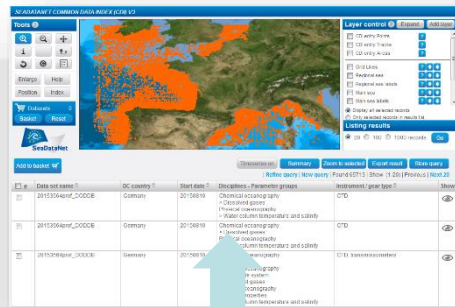

- Position in the ecosystem of data/observing systems

MANAGEMENT

EMODnet

European Marine
Observation and
Data Network

SeaDataNet/Cloud cooperation and involvement: EMODnet

- EU initiative for an overarching **European Marine Observation and Data Network (EMODnet)** driven by Marine Knowledge 2020 and Blue Growth
- SeaDataNet qualified as a leading infrastructure for the EMODnet data management component and is driving several thematic portals from the start in 2008
- This synergy has resulted in many more data centres adopting SeaDataNet standards and connecting to the CDI Data Discovery and Access service while it gave a flying start to EMODnet

SeaDataNet/Cloud cooperation and involvement

- **Copernicus Marine Environmental Monitoring Services (CMEMS):** providing long-term archives and standards
- **European Marine Observation and Data Network (EMODnet):** providing infrastructure and standards for several portals
- **Marine Strategy Framework Directive (MSFD):** providing infrastructure, standards and data collections for several indicators
- **Large ocean monitoring systems (EuroGOOS, AtlantOS, Euro-ARGO, JERICO-Next, ..):** providing standards and validation + long-term archiving services
- **European Open Science Cloud (EOSC):** shaping the Blue Cloud pilot
- **Ocean Data Interoperability Platform (ODIP):** exploring and demonstrating common standards and interoperability with leading data management infrastructures in USA and Australia

SeaDataNet/Cloud cooperation and involvement

- **GEOSS - EuroGEOSS:**
 - Maintaining the GEOSS portal with SeaDataNet in-situ data collections from large community of European data holders (100+ data centres; 600+ data originators)
 - Ambition to play an active role in EuroGEOSS by providing standards, interoperability solutions, major European networks, large ocean and marine data management expertise, and capable developers
