

Seadatanet as an entity

Background: possible legal models

Now: What ?

Next: How ?

What should we keep doing together ?

Baseline

- Keep the consortium active
 - ◆ As a living group
 - ◆ As a data and metadata provider
- Distributed and central components of the network must remain operational after the end of SDN2
- Tools must be maintained (bugs correction)

What should we keep doing together ?

As a (funded) legal entity

- Sustain software, vocabularies, ingestion of new data
- Take part in H2020 calls
- Seek for other funding sources
- Expand international awareness
- Ensure training and capacity building

What should we keep doing together ?

New developments

- Produce INSPIRE-compliant outputs (« thematic data layers »)
- Stay in line with other EU initiatives (...?)
- Provide features for interdisciplinary data mining & analysis
- Common data models
- Linked geospatial data platform
- Semantic sensor network ontologies
- Enlarge user community
