

Dear colleagues,

Here are the graphs for monitoring the SeaDataNet catalogues content (all documents are available on the extranet of the project under [SeaDataNet II > Follow up](#)).

You can see that there are **increases** on the following catalogues: EDMO (+8), EDIOS (+1), EDMERP (+4) and CDI (+5 364) (see Figure 1).

There is no increase on EDMED.

There is a decrease on the CSR (-674) content linked to duplicates checks performed by BSH on BODC records.

For May 2013, the increase in the CDI catalogue is the following (see also Figure 2 and 3):

Data centre	Country	Number of new records
HCMR	Greece	+6
NIOZ	Netherlands	-4
TSU-DNA	Georgia	+6
TUBITAK-SHODB	Turkey	+50
UniHB	Germany	+5306
Total		+5364

2 new data centres are connected: TUBITAK-SHODB (Turkey) and **UniHB** (Germany).

2 data providers are still not connected but are working on the connection: **IGEWE** (Albania), **INRH** (Morocco). Their connection is planned before the end of July 2013.
