

## October 2014 – SeaDataNet catalogues follow-up

Here are the graphs for monitoring the SeaDataNet catalogues content (all documents are available on the extranet of the project under [SeaDataNet II> Follow up](#)).

In October 2014, **global increases on catalogue CDI (+5 155), EDMO (+228), CSR (+37)** and not much on **EDMED (+1), EDMERP (+2)**.

No activities on **EDIOS-PRG**.

We notice a decrease of CDI (- 3 292) for SDN partners, due to :

- 1) Argo real time deletions by IFREMER,
- 2) The fact that SIO-RAS was publishing other data from another Russian institute ( SOI-RAS – not SDN partner) which has now its own connection to the infrastructure and is gradually adding its CDIs.

Details of last month upgrades per partners are the following:

CDI partner	Country	Last increase
IFREMER	France	-6 823
LIAE	Latvia	98
MSI	Estonia	2
NERC-BODC	United Kingdom	7 533
NERI	Denmark	18 048
RIHMI-WDC	Russian Federation	6 997
SHOM	France	-2
SIO-RAS	Russian Federation	-29 143
TSU-DNA	Georgia	-2
<b>Total</b>		<b>-3 292</b>

2 partners, not in the SeaDataNet consortium, have input a total of 8 447 new entries in the CDI catalogue, which explains the increase of CDI number (5 155) despite the CDI decrease of SeaDataNet partners (- 3 292).

Since the beginning of the follow-up reports (October 2012), the global increase in CDI, per partner, is the following: Note that for SMHI, TSU-DNA and SIO-RAS the negative global decrease is due to the change in their time series management (SMHI), the duplicates detection (TSU-DNA) or the change of data owner. Only one partner is inactive concerning the input of new data in the CDI catalogue.
