

## April 2015 – SeaDataNet catalogues follow-up

All documents used to write this report are available on the extranet of the project under [SeaDataNet II> Follow up](#).

In April 2015, global increases on catalogue **CSR** (+66), **EDMO** (+ 49), and no activities on **EDMERP**, **EDMED** and **EDIOS-PRG** .

A global decrease of **CDI** records is noted (-880).

Details of last month upgrades per partners are the following:

CDI partner	Country	Last increase
<b>BSH-DOD</b>	Germany	<b>161</b>
<b>EPA</b>	Lithuania	<b>144</b>
<b>IEO</b>	Spain	<b>-64</b>
<b>IFREMER</b>	France	<b>1 335</b>
<b>IHPT</b>	Portugal	<b>-112</b>
<b>IMGW</b>	Poland	<b>-2 534</b>
<b>INSTM</b>	Tunisia	<b>102</b>
<b>IO-BAS</b>	Bulgaria	<b>251</b>
<b>LIAE</b>	Latvia	<b>10</b>
<b>MHI</b>	Ukraine	<b>-8</b>
<b>MI</b>	Ireland	<b>20</b>
<b>MUMM</b>	Belgium	<b>18</b>
<b>NERC-BODC</b>	United Kingdom	<b>-1</b>
<b>OGS</b>	Italy	<b>12</b>
<b>SMHI</b>	Sweden	<b>593</b>
<b>TSU-DNA</b>	Georgia	<b>12</b>
	<b>TOTAL</b>	<b>-61</b>

16 SeaDataNet partners have input or deleted data in the CDI catalogue, for a total decrease of 61 records (\*), and 6 partners, not in the SeaDataNet consortium, have worked on data for a total decrease of 798 records.

(\*) IGEWE (Albania) has withdrawn from SeaDataNet project (-21 records less)

Decreases observed for IEO and IHPT is linked to duplicates detection. The important decrease for IMGW is due to the removal of ODV files with errors that will be corrected later on.

The CSR automatic harvesting is done once a week in 4 data centres: IEO, IFREMER, HCMR and OGS.

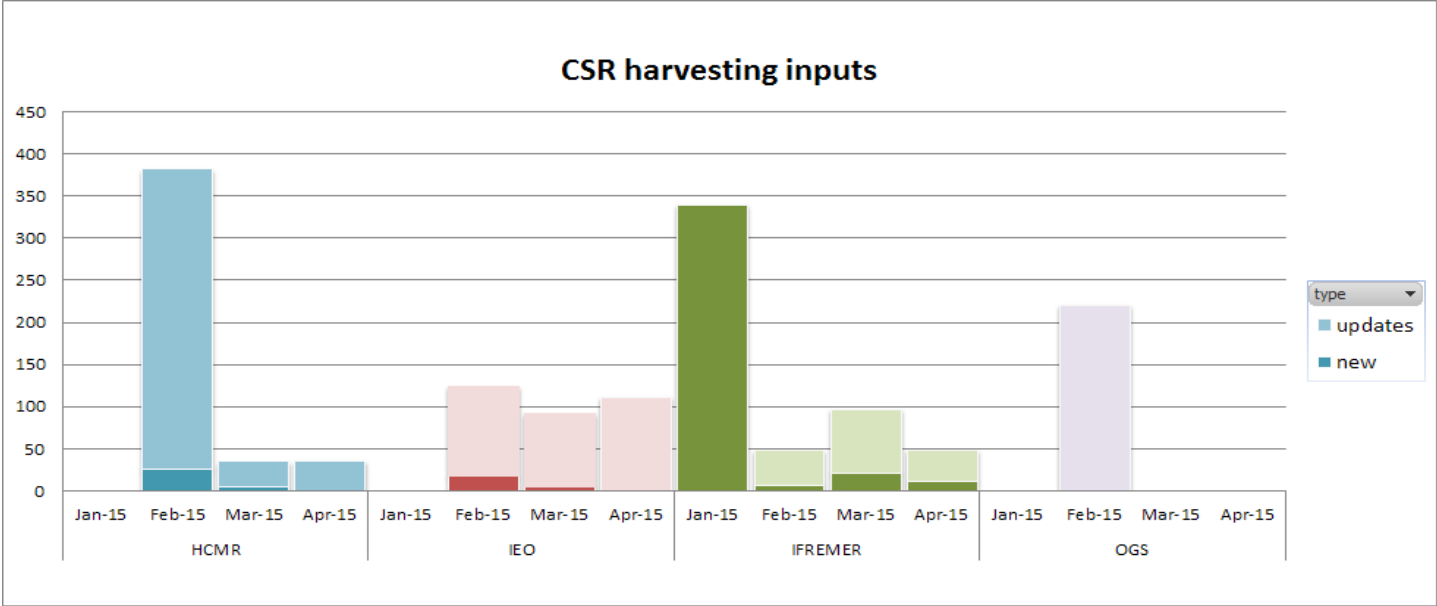

For April 2015, the result of this harvesting is 12 new records of CSR, and 184 updated records.

Details of harvesting per centre are the following:

Centre	Date	New	Updates
IEO	07/04/2015		71
IEO	14/04/2015		41
IFREMER	14/04/2015	12	37
HCMR	28/04/2015		35
<b>Total</b>		<b>12</b>	<b>184</b>

OGS had no CSR creations or updates during this month.

The graph below shows the CSR harvesting inputs since beginning of 2015:

Since the beginning of the follow-up reports (October 2012), the global increase in CDI, per partner, is the following: Note that for SMHI, TSU-DNA and SIO-RAS the negative or low global increase is due to the change in their time series management (SMHI), the duplicates detection (TSU-DNA) or the change of data owner and the remove of incorrect records (SIO-RAS. The new owner is SOI, not in the SeaDataNet consortium). Only one partner is inactive concerning the input of new data in the CDI catalogue.

CDI partner	Name of partner	Country	Nb 05/05/2015	Global increase
<b>SIO-RAS</b>	P.P.Shirshov Institute of Oceanology-RAS	Russian Federation	9 901	<b>-28 922</b>
