November 2015 – SeaDataNet catalogues follow-up

All documents used to write this report are available on the extranet of the project under SeaDataNet II > Follow up.

Statistics on all catalogues
In November 2015, global increases on catalogue CDI (+3 857), CSR (+119), EDMO (+20), a little decrease on EDMED (-1) and no change for EDMERP and EDIOS-PRG.

</tbody>
</table>

- 8 SeaDataNet partners have input or deleted data in the CDI catalogue, for a total increase of + 3,451 records.
- For others partners, not in the SeaDataNet consortium, 2 have worked on data for a total of + 406 records.
Since the beginning of the follow-up reports (October 2012), the global increase in CDI, per partner, is the following: Note that for SMHI, TSU-DNA and SIO-RAS the negative or low global increase is due to the change in their time series management (SMHI), the duplicates detection (TSU-DNA) or the change of data owner and the remove of incorrect records (SIO-RAS. The new owner is SOI, not in the SeaDataNet consortium).
